

Digital Flow Controller- Panel Mounting

Product Description

As a well-known manufacturer, exporter and supplier in this domain, we are offering high quality Field Mounting Digital Flow Controller. Our offered indicator is used for indicating the water flow in M3/hr / LPH / LPM / LPS / GPMus / GPMuk and also totaliser reading in m3 / Liters / Gallon. Manufactured using optimum quality raw material and modern technique at our ultr-modern manufacturing unit, this indicator is quality tested on certain parameters of our quality. The offered Field Mounting Digital Flow Controller is offered in various specifications at the most reasonable price to the clients.

Features:

- High performance
- Durability
- Longer service life
- Energy efficient

Technical specifications:

Function	Rate indicator cum Totalizer
Display	16 X 2 LCD display
Supply Voltage	230 V AC
Linearity	+1% of full range
Repeatability	+0.5% of full range
Inputs	Nuclus flow sensor (P812)
Configuration Lock	Password protection
Calibration	Using front membrain keys
Output	5A pot. Free Relay @230VAC
Meter Size	110 mm X 110 mm X 150 mm
Cutout Size	90 mm X 90 mm
Protection Rating	IP65 for field mounting unit
