

DRY TEMPERATURE BATH

TB-550

Electronically controlled Calibration Instruments (Dry Temperature bath) For thermometers, Temperature Sensor (RTD /TC) and temperature Switches Calibration.

DESCRIPTION

We offers medium temperature range from ambient to 550°C. It is a highly stable standard furnace for calibrating thermocouples / RTD .

It has been designed for medium range temperature calibration and find application in the Process Industries, Pharmaceuticals, Calibration Labs, automotive & material .The temperature of the calibrator is set and controlled by a self tuned PID controller.

KEY FUTURES

- Large Immersion Depths
- Wide Operating Range (Ambient to 550°C)
- High Stability
- Simple to use and cost effective

STANDARD ACCESSORIES

- Operational Manual
- Interchangeable Inserts
- Carrying Case

MODEL : TB-550

TECHNICAL DATA:

Temperature Range	: Ambient to 550°C
Temperature Resolution	: 0.1°C
Accuracy	: ±0.7°C
Controlling Sensor	: RTD Sensor
Method of Control	: Digital self tuned PID Controller
Time to Reach Max Temp	: 15 Mins.
Time to Reach Max Temp to 100 °C	: 7 Mins.
Operating Temperature	: 20 to 45°C
Power Requirement	: 230 VAC, 1 KW
Dimensions	: 330(H) x 150(W) x 310(D) mm
Weight	: Approx 10 Kg

CARE INSTRUMENTS

Head office:

FF-4, Kaveri Complex,
Nr. R.T.O. Circle, Subhashbridge,
Ahmedabad-380027.

Email : sales2@carepg.com
